RapIDMatic Evo Applicator
For the application of Allflex RapID Evo tags only
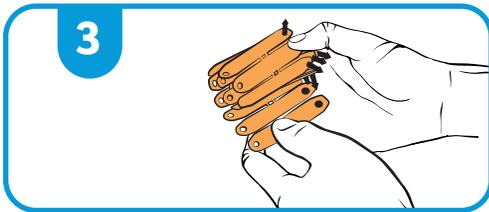

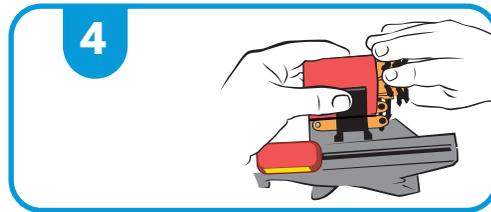

Allflex®

MSD
Animal Health

1 Ensure loader/cutter is in the locked position (at front of applicator).
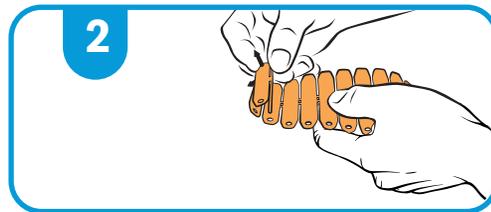

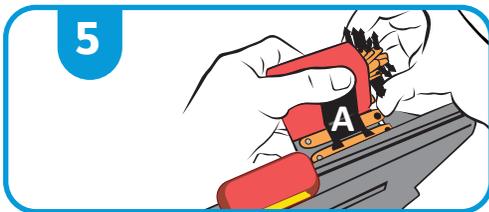

2 Roll RapID Evo Tags towards you firmly. Bias the pins outwards to avoid jamming.

**3** Leave the last two RapID Evo Tags Unrolled.
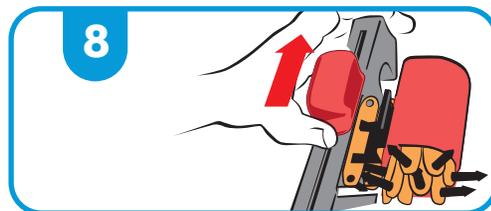

4 Load into drum.

**5** Depress the clamp (A) firmly. Slide tags out until location lugs are between first and second tags.

6 Pull trigger to move tag into the Load position.

⚠ Ensure that the applicator is tilted to the left in the following steps

YES   NO

7 Pull topslide back to cut the tag.

**8** Push topslide forward to load into applicator jaw.

9 Check tag position.

10 Avoid Iodine based disinfectants when sterilising tags. If irritation occurs after applying the identification tag, please consult your veterinarian for appropriate treatment.

11 Select optimum position on ear for tag. Pull trigger to apply.

Tags should be located as close to the head as practically possible, allowing room for growth if required.

Keep your trusty Allflex Sheep Tag Applicator running at full speed by keeping it clean. All it takes is a quick rinse of water to loosen any dirt or grime that might have accumulated during tag application.

Remove the barrel to clean inside applicator.

For best results wash the applicator periodically during application sessions.
